When you would plant or graft, consid
where the wind bloweth: if it be in t
South it is very good for that purpo
but if it be in the North or East, it is not good.

It is good to plant or graft generally the Moon i
creasing in these Signs, Taurus or Aquarius in the b
ginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is
Taurus, Leo or Aquarius.

Cut timber to have it sound, in December or Januar
in the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the moss in the month
January.

Plash hedges and low trees for fuel, that the hea
may the sooner grow again, when the Moon is in Ar
or Libra, and in her increase.

Set young quick-sets, from September to March.

Remove young trees in the last quarter of the Mo
when she is in Aries, Libra, Scorpio: & in these month
September, November, February.

Set vines in February, March, or September specia
the Moon in Aries, Libra, Scorpio, in her increase.

Set Rose-trees in the midst of February, when
Moon increaseth.

Cut or prune trees in March or April, the Moon
Taurus, Virgo, or Capricorn.

Gather fruit, as Apples, Pears, and the like, at
full of the Moon, in the afternoon the weather be
fair and dry.

Cut down Hay presently after the full of the Moo

Dung ground to prevent the growing of weeds,
Moon decreasing.

Sow Carret-seeds about the end of February or
beginning of March, the Moon increasing.

Sow Onions and Leeks in February or March,
the wane of the Moon.

Set Cucumbers and Melon-seed not above
inch in depth, from the first of April to the 30 in
increase of the Moon.

Tables of Interest at 6 l. per Cent.

Of WINTER.

WInter Quarter (after the Astronomical account) began the 11th of December, at which time the Sun entered into Capricorn the last year, and continues till the 20th of March this year. So that always the first part of the Astronomical Winter Quarter is in one Politick year, and the latter part thereof is in the other.) At which time was the most east day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and, in this Quarter the inward parts of Man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sicknesses whereunto this Quarter is most inclined, are *Rheums, Coughs, Pleurisies, Sore Eyes, Melancholy, Coughs, Catharrs, Squinsies, Falling-Sickness*, Diseases proceeding of *Re-*

of *Infirmities* incident among Women.

Of the SPRING.

THe Spring-time (being the most pleasant and Wholsom Season of the Four) taketh its beginning on the Tenth of *March*, when the Sun entreth into the Equinoctial point *Aries*, making the days and nights of equal lenght; which Quarter endeth the 20th of *June*, when the Sun entreth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are, *Melancholy*, *Madness*, the *Falling Sickness*, *Bleeding* at the *Nose*, *Meagrims*, *Coughs*, *Itch*, *Scabs*, many *Ulcers*, and small *Apostumes*, the *Gout*, and *Pain in the Joynts*, *Pleurisies*, *Dropsies*, *Pestilent Agues*, *Shortness of Breath*, *Faintings*, *Pain in the Head*, *Eyes*, and *Stomach*, *Rotten Feavers*, and other *Strange Diseases*.

Of SUMMER.

SUmmer (accounted the Third part of the Year *Astronomically*) taketh its beginning at the time of the Suns entrance into the first min, of the Solstitial Sign *Cancer*, which is the

Tenth

greatest declination from the Equinoctial towards the North, and maketh the longest day and shortest night in the year; and so Summer holdeth on till the 12th of September following.

In this Quarter the Scorbutick ichor dispels such hard Meats as it will in the Winter season, for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in Winter.

The Sicknesses at this time are divers, as *Burning Agues, Pleurisies, Frenzies, Hot Apostumes, Divers pains in the [illegible], Dysenteries, Infammations*, and *Nasty Infirmities*; [illegible] especially of *Hot Cholerick Humors*, [illegible] with many will be sore molested.

of AUTUMN or HARVEST.

Autumn or *Harvest* (being the Fourth, or last Quarter of the Year) begins upon the 12th of *September*, the Sun then making his entrance into the second Equinoctial Sign *Libra*, working the same effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, rising at six in the morning, and setting at six at night; and this Quarter doth last until the Eleventh of *December* following.

The quality of this Season is naturally cold & dry, yet by reason of its temperature, 'tis the most wholesome; by means whereof, it is more subject to heal diseases than any other, for the drugs of all diseases, of the former parts of the year, will now break forth and be seen.
